# A REVOLUTION IN SAFETY & SECURITY

## COLUMBIA GUARD: ANOTHER LINE OF DEFENSE

It's widely recognized that lockers are a key point of transfer for harmful bacteria in public areas such as schools, hospitals, nursing homes, and doctor's offices. PSiSC is proud to present Columbia Guard - a *microbiocidal* that kills harmful bacteria **on contact**. The antimicrobial protection is infused throughout the material, making these lockers both safer and more secure.

With the onslaught of MRSA, staph, and other infections, healthcare managers, superintendents, and other key leaders are eager for preventative solutions. Columbia Guard is a permanent additive that will not dissipate over time or scratch off, giving it the permanent efficacy against MRSA, E. Coli, and other dangerous bacteria.

## TESTED & PROVEN

The Columbia Guard Antimicrobial Agent has been tested and proven for its efficacy. For a product to be considered "Antimicrobial," it must score above a 2.0 on the JIS Z 2801 test.

Columbia Lockers infused with Columbia Guard scored a **4.0 and greater efficacy rating** and is proven to be effective against Escherichia Coli, Staphylococcus, and Methicillin-resistant Staphylococcus aureus with a **99.99% kill effectiveness on contact**.

## FEATURES & BENEFITS

### SAFER, MORE SECURE STORAGE

- Microbiocidal
- 99.99% Kill Effectiveness on Contact
- JIS Z 2801 Test Result of >4.0 Efficacy
- Fire Rated Materials Available
- Contributes to LEED Certification
- Moisture-proof
- Graffiti and Wear Resistant
- Low Maintenance
- Like New Appearance for years to come
- Can be Cleaned Using Strong Chemicals

#### State of the Art Hinge

Columbia Lockers offers a unique uni-hinge that runs the entire length of the locker body.

#### More Secure Latch Design

A multi-point latching system is quieter, more secure, and ADA-compliant.

#### Antimicrobial Handle

The most important point of contact on a locker, our antimicrobial handles offer an added level of security and safety.

#### Multiple Color Options

Columbia Lockers never need painting and are available in multiple colors\* that will never fade or delaminate.
